What is a Community Plan?

- Provides direction to guide growth and development
- Designates land for a range of uses needed within the community
- Includes goals, policies, and implementation actions
- Guides public decision-making and public investments

A NEW COMMUNITY PLAN = AN OPPORTUNITY FOR KEARNY MESA

- Reinforce Kearny Mesa's role as a job center for San Diego
- Identify strategies to enhance how people commute
- Promote the Convoy Street Corridor as a walkable destination
- Be a model community for how to plan for climate change
- Revitalize key activity centers and increase employment options

KEARNY MESA CONNECTED SCHEDULE

A draft Community Plan, including a draft land use and transportation plan, will be developed, and an environmental impact report will be prepared.

Welcome to the Kearny Mesa Community Plan Update

In this open workshop, we encourage you to:

What are the Climate Action Plan Goals?

CLIMATE ACTION PLAN GOALS

- **By 2020:** Reduce emissions by **24%** below the 2010 baseline
- **By 2035:** Reduce emissions by **51%** below the 2010 baseline

A **Transit Priority Area (TPA)** is an area within one-half mile of a major transit stop that is existing or planned.

CAP STRATEGIES

- 1. ENERGY & WATER EFFICIENT BUILDINGS** Green building techniques include improving the efficiency of mechanical and electrical systems using energy-efficient lighting; and using cool roofing materials.
- 2. CLEAN & RENEWABLE ENERGY** On-Site generation of energy and installing large scale renewables, such as wind and solar, will reduce the burning of fossil fuels and support local job creation.
- 3. BICYCLE, WALKING, TRANSIT & LAND USE** Promoting a compact, mixed-use urban form and designing streets to make it safer and attractive for people to get around without a car are examples of measures that support reducing vehicle miles traveled (VMTs).
- 4. ZERO WASTE** Options for managing waste including source reduction, increased recycling, and gas capture.
- 5. CLIMATE RESILIENCY** Climate resiliency entails developing programs, policies, and processes that accommodate unexpected events.

WHAT IS A LINEAR PARK?

A type of park that is longer than it is wide with recreation amenities and connects two or more points of interest.

Characteristics of Linear Parks:

- Exist in high density places with access on foot and via transit
- Attractive and interesting, offering changing views and connecting points of interest
- Wide enough to safely allow bikers and pedestrians, where both are expected
- Opportunities to purchase food and pleasant places to take a rest

Examples:

Martin Luther King, Jr. Promenade

Heritage Ranch Linear Park
